

How to Assemble your New Lampshade

Congratulations on choosing your new Home Concept® Premiere Lampshade!

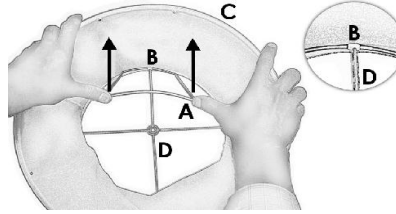

Our exclusive "flat-pack" design is easy to assemble and will provide years of faithful service.

1. Locate your shade and rectangular support arms.

Turn your shade upside down.

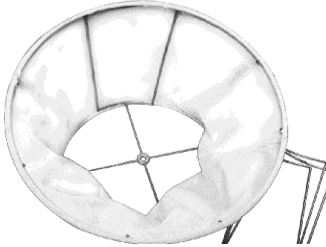

2. Grab one support arm and align the notch of support arm "B" in the CENTER of a brass spider arm "D".

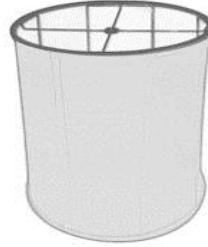

Using both thumbs, bring the bottom of the first support arm to the bottom rim of the shade. Be sure that the curve of the support arm "A" matches up with the curve of the bottom shade ring "C"

3. Tuck the support arm behind the 2 pegs on the bottom rim.

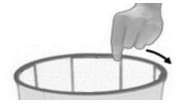

You may have to stretch the shade slightly for the support arm to fit. A tight fit ensures no wrinkles in your new shade!

4. Repeat steps 2 & 3 for each support arm.

To collapse your shade for moving or storage, slide the bottom of each support arm to the side until it's free of the brass pegs.

Home Concept® Premium Softback Lamp Shades

If your shade does not fit perfectly at first, try a different harp to lower or raise the shade.

Spot clean with a damp cotton cloth or Vacuum Shade with a soft attachment.

Keep all shades at least 2" away from light bulbs.
